

SEMI SYN MD-CF

Multiguard Semi Syn MD-CF is an economical semi-synthetic metalworking fluid used primarily for cutting and grinding of carbon, high speed, cast, alloy, tool, stainless steels, cast iron, aluminum, bronze and brass. The versatility of Multiguard Semi Syn MD-CF allows it to be used for light to moderate duty applications by varying concentration. It machines clean and is suitable for both hard and soft waters. Its biostable formulation provides outstanding sump life and remains mild to the skin.

PERFORMANCE BENEFITS

- Excellent performance on cast iron, steel and light aluminum machining.
- Excellent rust protection.
- Very clean running.
- Eliminates clinkering in cast iron systems.
- Provides excellent lubrication.
- Hard water stable.

RECOMMENDED APPLICATIONS

APPLICATION	CONCENTRATION
GRINDING	3% to 5%
GENERAL MACHINING	5% to 7%

TYPICAL PROPERTIES

APPEARANCE	AMBER LIQUID
pH @ 5%	9.6
POUNDS PER GALLON	8.41
FLASH POINT	>325°f
